

# map&guide fleet navigator 5.5

## The mobile navigation system for your vehicle fleet

Acting as pioneer, the map&guide brand was developed specifically for the business market right from the start. map&guide fleet navigator is a highly efficient solution for companies with their own vehicles. The software does not only navigate your drivers quickly and safely to any destination throughout the whole of Europe. Connect map&guide fleet navigator to your company's system and you have a highly-efficient fleet management tool.

### Award-winning!

Winner of the TeleTraffic readers' choice 2008: map&guide fleet navigator

### Basic functions

Mobile navigation is a popular alternative to an expensive installation. map&guide fleet navigator provides:

- Door-to-door cross-border navigation
- Intuitive, easy operation
- Precise visual cues and spoken instructions
- 2D and 3D navigation using map&guide's clear, intuitive maps
- Proven, professional map&guide routing and navigation
- Extrapolated positioning in tunnels
- Dynamic navigation: The latest TMC information is received on a TMC receiver free of charge and used to update the route while on the road.
- map&guide fleet navigator supports the following languages: German, English, French, Dutch, Italian, Spanish, Portuguese, Danish, Norwegian, Swedish, Polish, Czech, Slovak, Slovenian, Hungarian, Romanian, Turkish, Russian, Bulgarian
- Auto-Smartzoom for optimum map information when approaching a manoeuvre
- Incorporates directional information on highway signs
- Automatically switches between day and night view
- **New:** Speed warning limits also for trucks in many countries
- **New:** Text2Speech as standard for CarPC

- **New:** Entry of coordinates
- **New:** Global search for POIs

### Connected navigation

map&guide fleet navigator can be used in the control centre to manage car navigation, for example for your service employees: Order files (RC interface) and interfaces in C and C# (RI interface) enable communication between map&guide fleet navigator and a second software, which creates the communication to the control centre. These functions are used to:

- send stop-off points as address from the control centre to the navigation
- request GPS positions from the navigation and make them available to third-party applications
- start and end mobile navigation
- transfer and display messages to the navigation
- **New:** Completely revised documentation
- **New:** Guided navigation: Transfer of entire route navigation

### One fleet - various vehicle profiles

Create different vehicle profiles for the various vehicles in your fleet – this ensures that navigation is tailored to the vehicle. When creating vehicle profiles for cars and trucks with map&guide fleet navigator the following criteria can be taken into account:

- Speed profile
- Avoiding motorways or ferries
- For cars: Optimisation of route in terms of economy or time
- For trucks: Avoiding smaller streets (bypasses), turning, residential areas

### Truck-specific routing

Normal navigation systems are designed for cars, but truck drivers have different needs:

- Narrow side roads are automatically avoided to ensure realistic truck navigation.
- When planning routes map&guide fleet navigator automatically avoids residential areas if trucks are selected as a vehicle. The residential area is entered at the very last moment before reaching the destination.
- The driver decides the extent to which narrow side roads and driving through cities is avoided. Different routing profiles can be selected for this purpose.
- The navigation is able to recognise when destination and start addresses lie in areas of blocked access, e.g. pedestrian zones or factory grounds. In these cases you are also safely guided to your destination.
- **New:** Turning manoeuvres can be avoided more strongly.

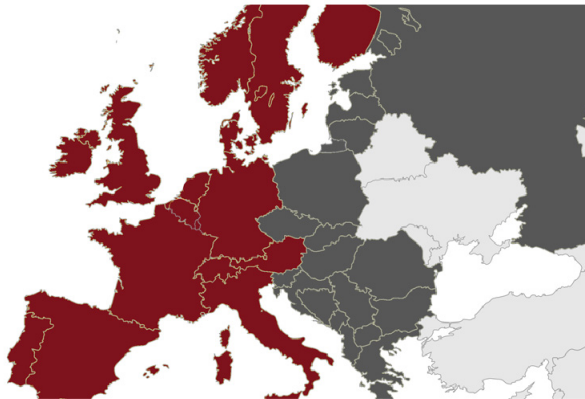

### Available maps

- DACH City (Germany, Switzerland, Austria, Liechtenstein)
- Map package Europe

Verfügbare Kartendetaillierung

- Detailed Network: Das beste Straßennetz mit Vollabdeckung ("City")
- Major Roads Network: Überlandnetz mit den wichtigsten Hauptstraßen (oder besser)
